HDCVI CAMERAS

Fixed IR HDCVI Cameras	25-27
Eyeball HDCVI Cameras.....	28
PIR Camera.....	28
Fixed Mini-Bullet Cameras.....	29
HDCVI Fisheye Cameras	29
Multi-Sensor HDCVI Cameras	29
HDCVI PTZ Cameras	29-31

HDCVI DVRs.....	32-33
-----------------	-------

POPULAR MOUNTING SOLUTIONS

Network IP 4K Cameras	34
Network IP PTZ Cameras.....	35
Network Panoramic Cameras	36
HDCVI 4K Cameras	37
HDCVI PTZ Cameras	38
ePoE Cameras.....	39

Dahua Technology USA brings high-value, total security solutions to the North American market by focusing on leading technology and world class support. We're working hard to make Dahua the first name that comes to mind when you think of innovative video surveillance solutions

Authorized Distributors

To protect our customers' rights and interests, Dahua Technology USA only sells products through authorized distributors and not via e-commerce platforms.

Dahua's official website in North America is www.dahuasecurity.com. Any products purchased through unauthorized channels will not be eligible for Dahua's warranty and technical support. To verify whether a distributor is authorized please or if you are interested in becoming an authorized distributor or partner, please email sales.usa@global.dahuatech.com or call 949-679-7777.

Dahua is committed to providing our partners with comprehensive resources that will help them gain a competitive advantage and win more business. The three different All-Star tiers provide an array of opportunities and support.

There's a Dahua product for every solution! Dahua offers three series of products to suit simple through advanced applications. From basic products to the latest in cutting-edge video surveillance technology, Dahua provides feature-rich, reliable cameras, recorders, and accessories at a competitive price. The three tiers of offerings range from good, economical products to competitively priced, feature-rich products.

- Advanced security applications for medium and large businesses
- Ultra high resolution (up to 12MP)
- Smart H.265+, built-in Intelligent Video System (IVS) analytics
- IP Pan Tilt Zoom (PTZ) cameras feature a long-range optical zoom and Smart IR illumination over 650 feet
- Storage devices typically feature 32-, 64-, 128- or 256-channel RAID options with 4K recording

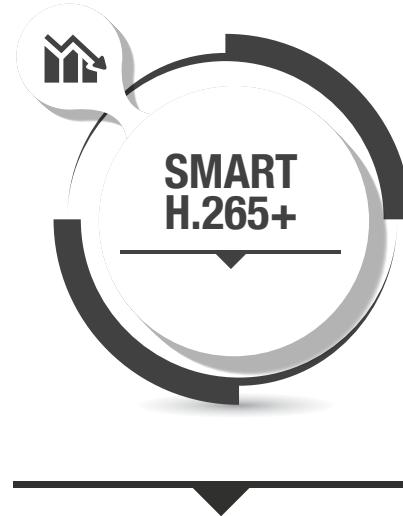

- Small-to-mid-size applications
- Built-in IVS analytics, IVS provides the ability to detect and analyze moving objects
- True Wide Dynamic Range (up to 120dB)
- Most IP and HDCVI PTZ cameras feature a short-long range optical zoom
- Storage devices typically feature 8-, 16-, or 32-channel options with 4K recording

- Small-to-mid-size applications
- Ideal for users with basic surveillance needs and uncomplicated scenes
- Digital Wide Dynamic Range (DWDR)
- IP and HDCVI PTZ camera options offer a short- or mid-range optical zoom
- Storage devices typically feature 4-, 8-, or 16-channel options

Dahua leads not only as a manufacturer but as an innovator. Dahua pioneered HDCVI technology, which produces high-definition images over coax cable. HDCVI has been an industry game-changer, resulting in more than 100 global partners. Dahua also engineered the Smart H.265+ codec, an optimized version of H.265. Smart H.265+ improves bandwidth and storage capabilities up to 80% over standard H.264.

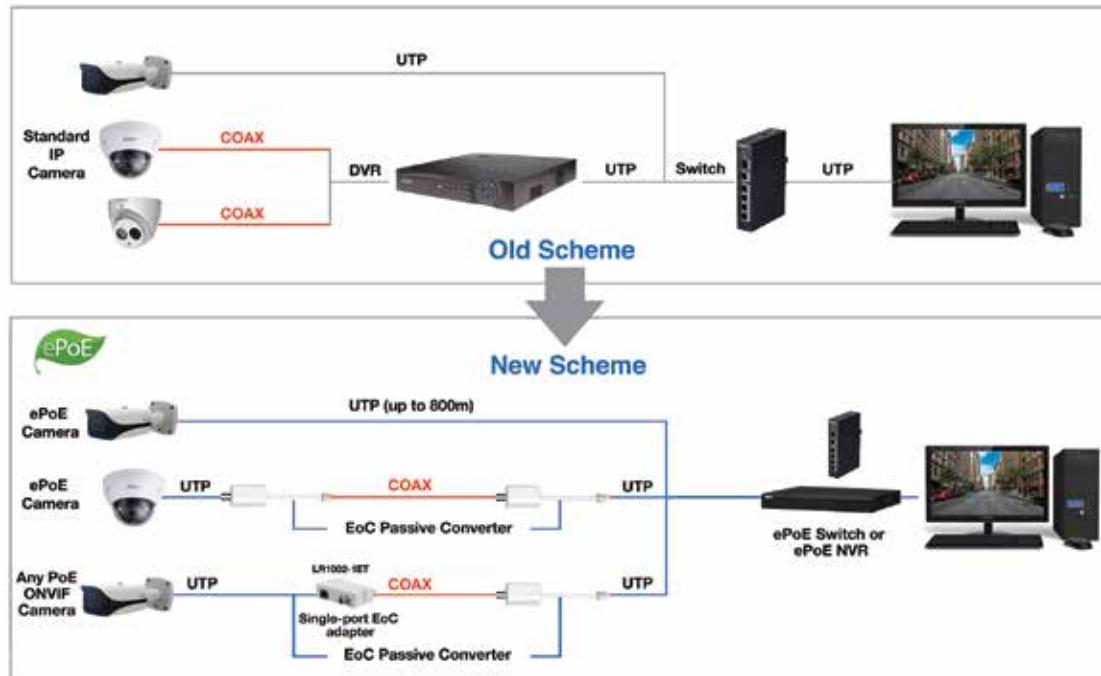

HDCVI 3.0, the latest release, includes intelligent features and up to 4K resolution, further extending the life of legacy systems and security investments. HDCVI is an open platform standard developed by Dahua Technology. It allows for up 4K UHD resolution over coaxial cable, extending the life of legacy infrastructure.

Dahua's line of Smart H.265+ cameras offer backwards compatibility with H.264 and H.265, allowing greater flexibility to configure different encoding options in a video surveillance system. Pair with a Dahua recorder for a full solution that is cost-effective and doesn't put strain on the network.

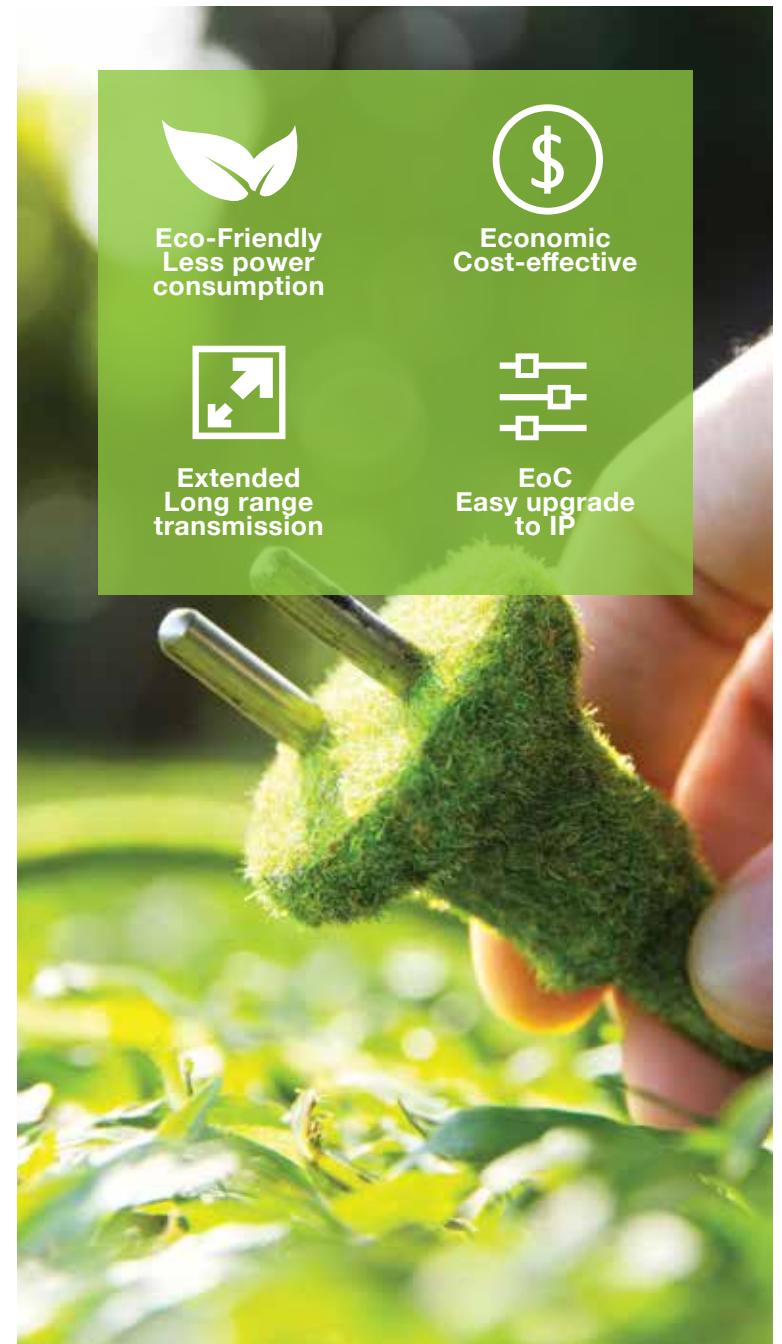

Dahua offers 3 levels of Starlight Technology in the good, better, best categories for low-light applications. The 5MP Pro Series cameras (N51 and N52), are a cost effective, basic version of Starlight that provides good images in low-light environments. Dahua's 2MP cameras offer enhanced Starlight Technology for professional applications that require better visibility under dark conditions. Starlight+ 4K cameras provides excellent images in ultra-low light conditions where color details are maintained longer.

ePoE technology offers a plug-and-play solution to transmit power and data over long distances via Ethernet or coaxial cables. ePoE technology is a viable, cost-effective solution for extending transmission distances and for converting existing, coax-based analog systems into IP systems.

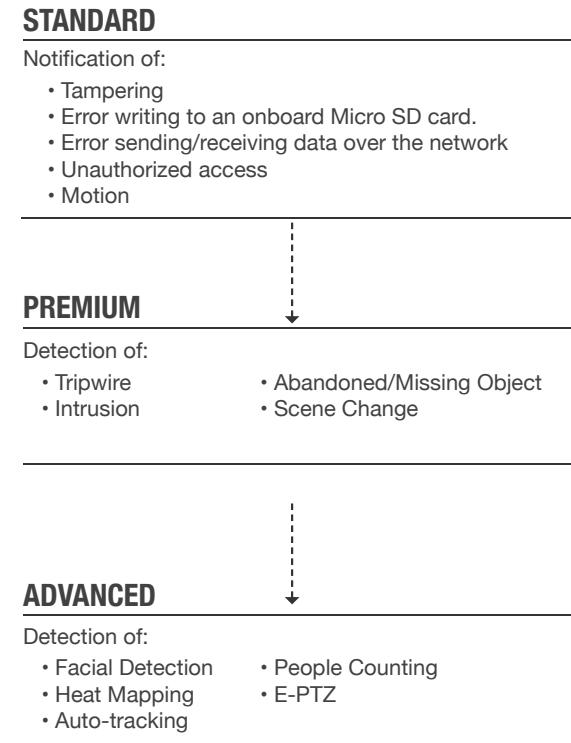

Dahua's innovative ePoE technology offers a plug-and-play solution to transmit power and data over long distances via Ethernet or coaxial cables, reducing installation time and saving money. ePoE technology is a viable, cost-effective solution for extending transmission distances and for converting existing, coax-based analog systems into IP systems.

Enhanced PoE encompasses pure IP systems where a single CAT 5 cable can carry signals up to 800 m (2624 ft), and IP/Analog hybrid systems where the technology leverages existing analog infrastructure to transmit power and data up to 1000 m (3281 ft) over RG59 coaxial cable. Enhanced PoE is compatible with three connection modes operating over the same network simultaneously: traditional IP networks, long-distance ePoE networks and coaxial networks. ePoE technology seamlessly integrates the latest high-definition IP cameras with a coaxial infrastructure using the Ethernet over Coaxial (EoC) protocol to convert between analog and IP power and data transmissions.

Intelligent Video System (IVS) is an intelligent solution that helps minimize an operator's time searching for data, increases effectiveness, and reduces response time. IVS works by using metadata via the smart search so that evidence can instantly be retrieved for all objects that entered or exited the scene. As a result, IVS saves operators time when searching for an event due to less recorded video to sort through. Thanks to the high level accuracy from IVS rules, fewer false positives trigger data recordings for a higher savings on storage.

Case Study: Toledo Cathedral

Toledo Cathedral is one of three 13th century High Gothic cathedrals in Spain. Dahua ensured the security of this landmark and the safety of ongoing maintenance operations by providing the cathedral with an integrated system featuring 5MP IP cameras and 2MP HDCVI cameras as well as advanced magnetic, heat, intruder, and fire detection features.

Case Study: G20 Hangzhou Summit

As a core provider for G20 security, Dahua provided over 20,000 sets of equipment, a 600 person security team, and dozens of advanced technologies in core and surrounding areas with around-the-clock uninterrupted surveillance in order to guarantee absolute security for the summit.

Case Study: 2016 Rio Olympic Games

Dahua was the main security surveillance supplier for the Rio Olympics, providing a total of 373 IP PTZ cameras, 1450 IP cameras, and related accessories. They were installed in the main stadium, the Olympic Village, other Olympic event areas, and on main roads to Olympic venues, displaying the best of Dahua Technology.

Case Study: Pescara Port

Pescara Harbor, a port stretching along the Adriatic Coast in Pescara, Italy, is an important hub for trading and tourism in the region. Dahua and its distributor in Italy, Videotrend, secured the port with a megapixel network solution consisting of 2 and 3MP IR cameras as well as weather-resistant speed domes and NVRs for storage.
